Subject: RE: PFAS Rinsate QAO review

On a meeting with Ed M as the chair now. He made a statement – Ex. 5 Deliberative Process (DP) “our data are being reviewed and we will release them early next week”

Limitation #2 should suffice.....in general, but we should decide if additional flags may be required:

- High background in any blank/control sample
- Poor fortification recovery
- Poor CCV data

I am not done reviewing the data, yet, but some of the above flags may apply.

Paul

See attached draft cover memo for the data. It includes a section for Limitation of the Data

Feel free to edit

Thuy

P.S. The graphs need to be updated

So that should be categorized as “limitation” in the data reported and should not make the data “semi-quantitative”, right?

Why can't the rinsate data be quantitative?

Thuy,

It is on my desk now, and I am hoping to finish up my initial pass today.....after talking to Yaorong and Yan.

David did fill in the gaps for some of the questions I had last Friday.

Hi everyone
How is the QAO review coming along?

Thanks
Thuy
